Introduction to Digital health

Design and Implementation of Digital Health Interventions

Evaluation of Digital Health Interventions

Imperial College
London

Nov 6, 2021

Aura Frizzati

has successfully completed the online, non-credit Specialization

Digital Health

This specialisation introduces students to the emerging and multidisciplinary field of digital health and the role and application of digital health technologies including mobile applications, wearable technologies, health information systems, telehealth, telemedicine, machine learning, artificial intelligence and big data. These digital health technologies are assessed in terms of their opportunities and challenges to address real-world public health and health care system challenges in order to improve the quality, safety and efficiency of these services. The aim of this specialisation is to prepare learners for the new era of digitalisation in public health and health care globally.

Céire Costelloe

Céire Costelloe
Senior Lecturer &
Director of Global
Digital Health unit
School of Public Health

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
